

CounterTop Banner

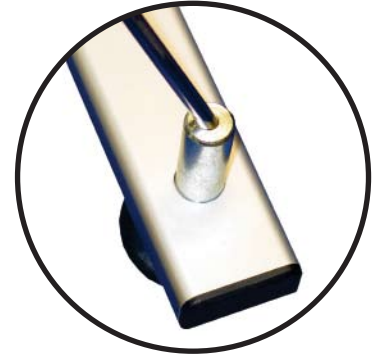

Step 1

Lay the display face down. Loosen the wingnut on the bottom of the back support. Twist the support out 90° so it is standing straight up. Lock the support into position by tightening the wingnut.

Step 2

Place the support rod into the holder that is on the top of the back support.

Step 3

Place the plastic cap from the top of the support rod into the center of the groove on the back of the banner. Setup complete.
