

CounterTop Retractor

Step 1

Open the top cover of the base and remove the top of the banner. Close the cover.

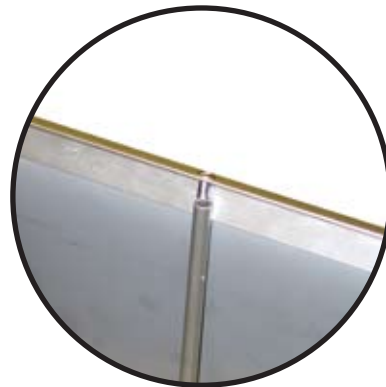

Step 2

Turn the plastic retainer to gain access to the support rod. Remove the support rod from its storage location.

Step 3

Hook the three sections of the support rod together. The elastic band inside the rod will keep it locked together. Stand the rod up.

Step 4

On the top of the banner is a peg. Pull the retractor out and insert the peg into the top of the support rod. Setup is complete.
