ACCESSORIES

5.5 x 2.5 DC
connecting cable
to Smart Space Products

Adapter

HOW TO USE

1. Plug the adaptor's AC port into the AC power outlet to charge

2. Plug the adaptor's DC port into the Smart Power's DC IN

* The LCD displays the charging range. When the light is flashing it means it is charging. After the charge is complete, the light stays on.

3. Connect the DC OUT (blue end) to Smart Space Products controller

CAUTION

1. When charging the Smart Power battery, only use our original adaptor, otherwise the Smart Power Battery may become damaged.
2. Please charge the Smart Power battery completely before using it the first time.
3. Before charging the electrical device, please confirm the voltage of the electrical device.
4. Don't drop, knock, disassemble or attempt to repair the Smart Power battery by yourself.
5. Don't immerse the Smart Power battery in water or get it wet.
6. Don't expose the Smart Power Battery to a heat source such as fire or heater.
7. Keep out of reach of children.
8. Don't use in the presence of flammable gas.
