

Quattro Standard

Instructions

Step 1

Situate the base (D) at the desired location, stretch out the Tensaflex (E) and place it according to the guiding dots. Verify proper vertical direction.

Step 2

Put together the hook and loop on the base with that on the Tensaflex. Leave one side slightly open.

Step 3

Place shelf (C), matching the guiding dots.

Step 4

Place shelf (B), matching the guiding dots.

Step 5

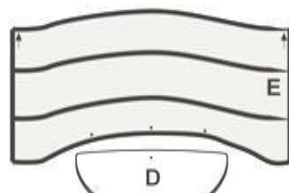

Place Top (A) starting with the guiding dots, firmly pressing the two shells of hook and loop against each other. Adjust the Tensaflex so that the hook and loop lines are securely fastened.

Step 6

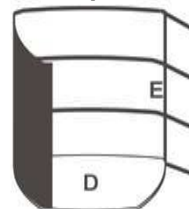

Locking Door (F)

Detach the Tensaflex (E), two inches from each side. Place the door on the base, open the door and press the doorframe's hook and loop against that on the Tensaflex. Then insert screws in the corresponding holes and tighten up with the provided nuts.

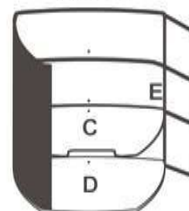

To dismantle follow the same steps in reverse order.
