

4 FOOT HOUSE ROOF (10% SCALE)

ARTWORK PLACEMENT/MEASUREMENTS

BODY PANEL x2

4 FOOT HOUSE ROOF: BODY PANEL

Bleed Area (Cut Size): Outer White Rectangle - 50" Wide x 33.5" Tall

We strongly recommend that you use this guide line for the edge of fills, raster images, etc. Even though it's not usually visible from the outside, as the vinyl this is being printed on is stretchy and is hand sewn, it is best to use this as the fill area to avoid the possibility that the wrong color may show at the seam.

Viewable Area (Finished Size): Grey Rectangle - 49" Wide x 32" Tall

This guide line shows you what will be seen once the vinyl has been sewn.

Edge of Stitching: Grey Dashed Line - 49" Wide x 31" Tall

This guide line is to show you approximately where the seam will be sewn onto the top.

Logo Area (Safe Zone): Center White Rectangle: 45" Wide x 27" Tall

This is the area we recommend using for the centering of logos/images. These outlines do not preclude images wrapping around the top, they merely show where we recommend the center of interest lie.

END CAP

BODY PANEL

4 FOOT HOUSE ROOF: END CAP

Bleed Area (Cut Size):

Outer White Triangle - 47" Wide x 23.55" Tall

We strongly recommend that you use this guide line for the edge of fills, raster images, etc. Even though it's not usually visible from the outside, as the vinyl this is being printed on is stretchy and is hand sewn, it is best to use this as the fill area to avoid the possibility that the wrong color may show at the seam.

Viewable Area (Finished Size):

Grey Triangle - 45.593" Wide x 21.842" Tall

This guide line shows you what will be seen once the vinyl has been sewn.

Edge of Stitching:

Grey Dashed Line - 41.597" Wide x 20.842" Tall

This guide line is to show you approximately where the seam will be sewn onto the top.

Logo Area (Safe Zone):

Center White Triangle: 34.348" Wide x 17.218" Tall

This is the area we recommend using for the centering of logos/images. These outlines do not preclude images wrapping around the top, they merely show where we recommend the center of interest lie.

COLOR/RESOLUTION

- 1) Our printer is closely calibrated to the PMS (Pantone Matching System) Coated chart. Use these spot colors for your submitted artwork. For raster images, please save them in CMYK format for the closest color match.
- 2) All digital artwork is printed 720 dip (dots per inch). As this template is 10% scale, please be sure all placed/raster images are at least 1000 dpi at the 10% size, or 100 dpi at 100% size.
- 3) Vector images, such as logos, are sent with text as outlines or with font folder included.

Please send all raster artwork embedded in the Illustrator/EPS file. We may need to make minor changes before production.
