

# Modular Event Counter

## Product Parts

- 1 - Folding Counter Top
- 2 - Adjusting Leg Bottom (x2)
- 3 - Feet (x4)
- 4 - Middle Leg
- 5 - Small Locking Lever
- 6 - Quick Release Pin
- 7 - Connector Bracket\*  
The Connector Bracket is stored loosely in the Folding Table Top.
- 8 - Large Locking Lever\*
- 9 - Graphic

## Display Set-Up

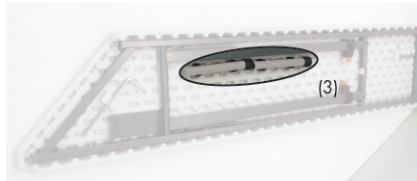

### Step 1

Carefully unfold the Folding Counter Top (1). The Connector Bracket (7) is stored loosely, so remove that and set it aside. Line up the Middle Leg (4) with the hole on the folding counter's middle bars and insert the Small Locking Lever (5) through the hole. Rotate the small pin until it fits into the slot against underside of the Counter Top, as shown here:

### Step 2

Remove the Feet (3). Unfold the upper leg sections from the counter top and straighten the diagonal connecting bars. Insert the foot extensions on the ends of both Adjustable Leg Bottoms (2).

### Step 3

Insert the Adjustable Leg Bottoms (2) into the upper legs on the counter. Several height options are available (indicated by holes on the retractable portion). Adjust the extension to the desired height. The red button will snap when secure. Please note that a graphic will only display properly when the legs are fully extended.

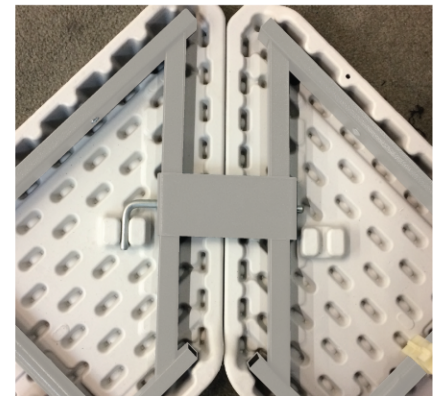

### Step 5 (optional)

Two or more counters can be combined at their 45° edges.

\*\*The graphics must be on both counters before combining.\*\*

Insert the Connector Bracket (7) horizontally, with the holes upward, through the slits on both graphics. Align the bracket holes with the holes on the 45° bars and insert the Large Locking Lever (8) until it's completely through the bracket. Rotate the lever to snap into the slot on the counter's underside.

(Underside, without graphic)

### Step 4

Unzip the Graphic (9) to drape it over the Counter Top. Zip it again to fit it to the frame.

## Storage & Care

Disassemble with care and ensure all parts are securely attached to the underside of the folding counter top. Fold the two sides together and store in a cool, dry place.
