## Step 1

*Clear any objects you do not want to cut around from your garage. Sweep excess dirt and dust from the floor.*

## Step 2

*Begin installation along the longest side wall and the garage door.*

## Step 3

*Lay two tiles on the ground with the pegs of one module aligned over the loops of another. Step firmly onto them to lock the pegs into the loops,*

## Step 4

*Lay a single row of tiles along the garage wall, leaving a 1/4" to 1/2" gap between it and the flooring.*

## Step 5

*Continue your installation across the garage door forming an "L" shape with your garage flooring*

## Step 6

*Fill in the "L" by moving across the garage opening and down the longest wall repeatedly.*

## Step 7

*Cut the floor to any size or shape using a table saw, jigsaw, utility knife, etc..*

*Follow manufacturer's safety guidelines with these tools.*

## Step 8

*Celebrate your choice of RaceDeck Garage Flooring while enjoying your favorite beverage and admiring your handy work.*
