Step 1: Assemble Counter Frame

Arrange pieces on the floor as shown in the diagram below. Assemble frame sides by securing CB10-R to F43 and TUBE-30-910. Continue frame assembly by locking F48s, F54s and F24s to extrusion. When locking be sure to turn each cam a little bit and then go back and tighten to the proper tension. Take care to turn locks only a quarter turn, so as to not strip the locks by over tightening.

Step 2: Apply Graphics & Attach Countertop

Apply push-fit fabric graphic(s) by pressing the FCE-2 edge of graphic into the channel of the extrusion. Start in upper left corner, go across the top and then down the sides to the bottom. Repeat for each side. Assure each graphic is tightly inserted. When taking graphics off, take care to gently pull by attached pull tab. To secure countertop, first place leg in the proper orientation. Insert the thumb connector into the bottom of the countertop and make a 1/4 turn clockwise to tighten in place.
