

Vector Frame Counter 02

VFC-02

Vector Frame™ counters compliment the Vector Frame series of exhibit kits, but are also ideal for any stand-alone event or display. Vector Frame counters couple simple extrusion-based frames with push-fit graphics or rigid sintra graphics. Tables are available in four colored finishes. Custom sizes also available.

features and benefits:

- Feature push-fit fabric graphics and simple extrusion based frames
- Choose from four tabletop finishes
- Easy step-by-step instructions
- Wheeled portable shipping case
- Lifetime limited warranty against manufacturer defects

dimensions:

Hardware	Graphic
Assembled unit: 55.13”w x 40.5”h x 22.5”d 1400mm(w) x 1029mm(h) x 572mm(d) Approximate weight: 64 lbs / 30 kg	Refer to related graphic template for more information. Visit: https://www.theexhibitorshandbook.com/download-graphic-templates
Shipping	additional information:
Packing case(s) 1 OCH2 Shipping dimensions: 52”l x 29”h x 15”d 1321mm(l) x 737mm(h) x 381mm(d) Approximate shipping weight: 94 lbs / 43 kg	Graphic material: Dye-sublimated SEG push-fit fabric Counter holds max weight 100 lbs / 46 kg When included in a larger kit, a different packaging solution will be listed to accommodate all contents of the kit. Individual packaging no longer provided. Tabletop Colors: <div></div> <div>silverblackmahoganynatural</div>
<div><p>This product may include the following materials for recycle: aluminum, select wood, fabric, cardboard, paper, steel, and plastics.</p></div>

Kit Assembly

Step by Step

Step 1.

Gather the components to build the counter frame sections 1 and 2. Use the Exploded View section 1 and 2 for part labels.

Reference Connection Method(s) 1, 2 and 3 for more details.

Step 2.

Gather the components to build the counter frame section 3. Use the Exploded View section 3 for part labels. Use section 3 to merge sections 1 and 2.

Reference Connection Method(s) 2, 3 and 4 for more details.

Step 3.

Apply the counter fabric graphics by pressing the edges of the graphic into the extrusion fabric channel.

Reference Connection Method(s) 5 for more details.

Step 4.

Gather the components to build the counter top and shelf. Use the Exploded View section 3 for part labels.

Reference Connection Method(s) 6 for more details.

Setup is complete.

Connection Methods

Connection Method 1: PMFC2-90-CAP

First, press button to insert the cap into the extrusion. The button will snap in place.

Connection Method 2: PMFC2 / PHFC2

First, with the cam lock disengaged, place the cam lock teeth into the extrusion channel. Second, use the allen key tool to lock it in place. Make half turns clock-wise to engage the cam lock. Do not over tighten the lock buttons.

Connection Method 3: CB10-R / PHFC2

First, press and hold the snap button while you slide it into the tube. The snap button connection is secure when it protrudes through the tube hole. Second, using the allen key tool, disengage the cam lock in the extrusion end and place its teeth into the CB10-R channel. Third, with the cam lock teeth in the channel, use the allen key tool to engage the cam lock. Make a half turn to lock, do not over tighten. Repeat for opposite end.

Connection Method 4: CAM LOCK / PE

First, with the cam lock disengaged, place the cam lock teeth into the extrusion channel. Second, use the allen key tool to lock it in place. Make half turns clock-wise to engage the cam lock. Do not over tighten the lock buttons.

Connection Methods

Connection Method 5: Silicon Edge Graphic (SEG)

VFC-02-A-G VFC-02-B-G

First, at point 1, start pressing VFC-02-A-G fabric SEG from top to bottom of the counter fabric channels. Second, work the SEG across the rest of the top and bottom counter fabric channels to point 2. At point 2, start pressing the fabric SEG from top to bottom of the counter fabric channel. Third, apply VFC-02-B-G fabric SEG from top to bottom of the counter fabric channels.

Connection Method 6: ROTO LOCKS

First, with the provided hand tool, disengage the male ROTO LOCK by turning counter clock-wise. Second, use the doll rods to help align the wood panels in place. Third, with the provided hand tool, engage the male ROTO LOCK into the female receptor with a snug 3/4 turn.
