Product Parts

- 1 - Base
- 2 - Top
- 3 - Leg Bottoms (x4)
- 4 - Leg Tops (x4)
- 5 - Lights
- 6 - Power Cord
- 7 - Graphic

Display Set-Up

Step 1

Screw the Leg Bottoms and Tops (3, 4) in to the holes on the Base and Top (1, 2) where their numbers match. Once they're all secured, carefully lower the Top onto the Base, so that the legs are combined.

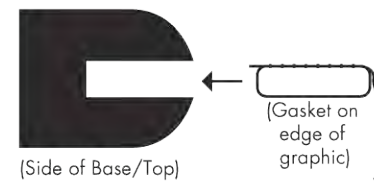

Step 2

Carefully unroll the Lights (5). Attach the end without the cord to the underside of the Top (2) by using the clips. Secure the lights by also attaching them to the clips on the Base (1). Attach the light set's cord to the base's plug near one of the legs.

Step 3

Apply the Graphic (7) to the display by feeding the gasket into the Top's (2) horizontal groove. Repeat this for the Base's (1) groove.

Step 4

Attach the Power Cord (6) to the plug on the underside of the Base (1). Plug the Cord into a power source to power the display. Make it easier to switch the display on and off by using a power strip or surge protector (not included).

Storage and Care

Store in a cool dry location. To clean the frame, unplug the display and wipe with a damp cloth. Do not wash the graphic.
